***Allowable Subject Matter***

1. The following is an examiner's statement of reasons for allowance: The subject matter of the independent claims could not be found and was not suggested by the prior art of record. The subject matter not found is a percutaneous insertion system comprising a needle assembly, a needle hub attachment assembly comprising an elastomeric valve, an assembly comprising a hemostatic segment having a valve and an opening permitting the passage of a guidewire therethrough, in combination with the features of the invention substantially as claimed. Also not found is an percutaneous insertion system comprising a needle assembly including a first hemostatic segment, an assembly comprising a second hemostatic segment, the assembly comprising a guidewire inserter having a reverse flared tip, and the proximal end of the needle assembly is shaped to conform to the reverse flare to comprise a leak free engagement, in combination with the features of the invention substantially as claimed.
2. The closest prior art of record is Clinton et al (US 5295970). Clinton teaches a device for percutaneous insertion of a guidewire. Clinton fails to teach the needle hub attachment assembly having an elastomeric valve. It would not have been obvious to modify Clinton to include such a valve because as can be seen in Fig. 1 of the disclosure, the needle includes a hole 50 which make any valve added to the element useless.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
